

Jordan McWilliams

Los Angeles, CA • jordanmcwilliams23@gmail.com • [LinkedIn](#) • [Portfolio](#)

Software Engineer with 5+ years of experience building C++ gameplay systems, tools, and pipelines in Unreal Engine. Contributed to AAA projects at PlayStation and award-winning indie titles, including IGF Game Finalist 'Try Again'. Passionate about creating scalable systems and immersive gameplay experiences.

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2025 – Present

Sony Interactive Experience - San Francisco, CA

- Spearheading Unreal Engine version upgrade on flagship project across multiple sprints, integrated custom functionality, replaced outdated AWS servers across 3 pipeline environments, and facilitated the upgrade's merge and release within a two-week sprint.
- Developing C++ functionality for Unreal Engine plugin serving multiple stakeholders using best coding practices and design patterns, ensuring features met stakeholder expectations.
- Implementing user interface and user experience features using UE frameworks, reflecting design team specifications and feedback, as well as receiving organization wide viewership.

Unreal Engine Freelancer

May 2022 – Dec 2024

Contract - Los Angeles, CA

- Developed core functionality and design documentation on *Cyberpunk Medical Simulator* project in Unreal Engine, implementing rapid prototyping workflows in order to proactively meet deadlines.

Refactor Games - Santa Monica, CA

- Implemented Inworld Generative AI system featuring AI-to-AI conversations and viseme-based mouth movement synchronization in Unreal Engine, improving the client's player count by 33%.
- Programmed procedural dungeon generation system using UE Blueprints with C++ backend, featuring handcrafted rooms and dynamic enemy encounters, increasing multiplayer player retention.
- Collaborated proactively with 3 cross-departmental teams to align game design objectives with player engagement metrics and technical feasibility.

Unity Developer

Aug 2023 - Feb 2024

Genies - Santa Monica, CA

- Designed a user-focused experience for the upcoming *Genies Party* incorporating interoperability amongst developer cohorts, receiving praise from 8+ cohort members.
- Iterated on multiple game prototypes using Unity Visual Scripting, improving game mechanics based on data-driven player feedback and analytics.

Technical Designer

Mar 2022 - May 2023

USC Games - Los Angeles, CA

- Worked on **2024 IGF Best Student Game Finalist** *Try Again* which received acclaim for its detailed visuals, exciting action sequences, and compelling narrative.
- Iterated on 5+ core game systems to enhance gameplay experience, managing complex technical challenges with creative solutions throughout the full development lifecycle.

EDUCATION

University of Southern California - Los Angeles, CA - 2019 - 2023

Bachelors of Science - Computer Science (Games)

Citrus College - Glendora, CA - 2017 - 2019

Associates of Science - Mathematics

SKILLS

Languages

- C / C++ *5 years*
- UE Blueprints *4 years*
- C# *3 years*
- Python *2 years*

Software

- Unreal Engine 5
- Git
- Visual Studio 22
- JetBrains Rider
- Perforce
- Unity

Soft Skills

- Leadership
- Problem-solving
- Team and Goal-oriented
- Creative
- Intuitive
- Collaborative
